Mobile Application Development

Class work: Most Popular Mobile OS (1999 – 2019)

Course Code: CSE-362

Name: Abdul Mukit

Class roll: 2592

Exam roll: 170491

Registration: 44129

Session: 2017-18

Date: 19 Feb 2021

Course Teacher: Dr. Md. Ezharul Islam

Most popular mobile OS 1999-2019

The journey of mobile OS ~~is~~ was started with Palm OS which was also known as Garnet OS. It was a dis-continued mobile operating system initially developed by Palm Inc. Palm OS was designed for ease ~~wit~~ of use with a touchscreen based graphical user interface. Laten version of the OS has bee extended to support smartphone. It was designed in 1996 for Palm computing and has been implemented on a wide array of mobile devices ~~&~~ including smartphones, wrist watch, handheld gaming console.

Palm OS version earlier run on Motorola processor. From version 5.0, palm OS run on ARM architecture processo

Windows Mobile - It is a discontinued family of mobile operating system developed by ~~my~~ microsoft for smart phones and personal digital assistant. It origin dated back to windows CE in 1996, through windows mobile itself first appeared in 2000 as pocket pc which run on ~~po~~ PDAs. It includes a suite basic application developed with microsoft windows API and is designed to have features and appearance somewhat similar to desktop version of windows. Most early windows mobile devices came with a stylus, which can be used to enter command tapping by screen.

Symbion OS

Symbion mobile operating system designed for smartphones. Symbian was oraginally developed as a ~~proper~~ proprietary software OS for PDA in 1998 by the Symbion LTD.

Symbian OS began as an operating ~~ea~~ system called EPOC, which was developed in 1980 by a company named Psion in 1998, a joint venture with telephone manufacturers ~~NOK~~ Nokia, Ericsson, and Motorolla. It was released exclusively on ARM processor although an unreleased x86 port existed.

Black berry OS Black berry OS was dereloped by canadian ~~me~~ company Blackberry limited in earlies ~~to~~ 2003 for its smart-phone handheld devices.

The operating system provided malty tasking, and support specialized input devices ~~that~~ have been adopted by black berry for use in its handhelds, particularly the taracwheel, trackball and most ~~recand~~ recently track pad and touchscreen.

Research from June 2011 indicated that approximately 45% of mobile

developers ~~ob~~ were using the platform at the time of publication

<u>IOS</u> - Ios is ~~ana~~ operating system created by apple inc. execlusively for its hardware. It is the operating system that powers many of companie's mobile devices, including iPhone and iPod Touch; ~~the~~ It is the world's ~~mos~~ second most widely installed operating system after andnoid. It is the basis for three other most operating system made by apple iPadOS, tvOS and watchOS.

Unveiled in 2007 for the first generation of iphone, ios has been extended to support other apple devices such as iPAD Touch (2007)

and iPad (January 2010). As of March 2018, Apple's App Store contain more than 2.1 million IOS applications, 1 million of which are native of ipad. ~~and~~ These mobile app have collectierely been downloaded more than 130 billion times.

Android

Android is a mobile operating system based on a modified version of linux kernel and other open-source software, designed primarily for touch screen mobile device such as ~~smarpt~~ smartphone and tablet. It was unveiled in November 2007

with the first commercial android device launched in September 2008.
